Precizon Presbyopic

Natural vision at all distances

A different approach to presbyopia correction

ophtec

Designed for patients wanting a full range of focus

Precizon Presbyopic is a presbyopia-correcting IOL that provides natural vision with no distinct focal points at any distance. Its Continuous Transitional Focus (CTF) technology delivers visual performance as close to natural vision as possible.

KEY CLINICAL BENEFITS OF PRECIZON PRESBYOPIC

Excellent distance vision

Clinical studies consistently demonstrate ~6/6 unaided binocular distance vision.[1]

Excellent distance acuity and premium visual quality.

Intermediate vision is strong

In direct optical comparison with PanOptix®, Precizon performed stronger across much of the intermediate range, where patients spend much of their day.[2]

Functional near vision

Extends vision beyond conventional EDOF performance into functional reading vision at ~40 cm.[1]

Comfortable near vision for everyday tasks.

Favourable quality of vision

Extended range without dysphotopsia.

Low rates of photic phenomena, with 95% reporting never or only occasional glare or halos, and 0% reporting severe glare or halos.[3]

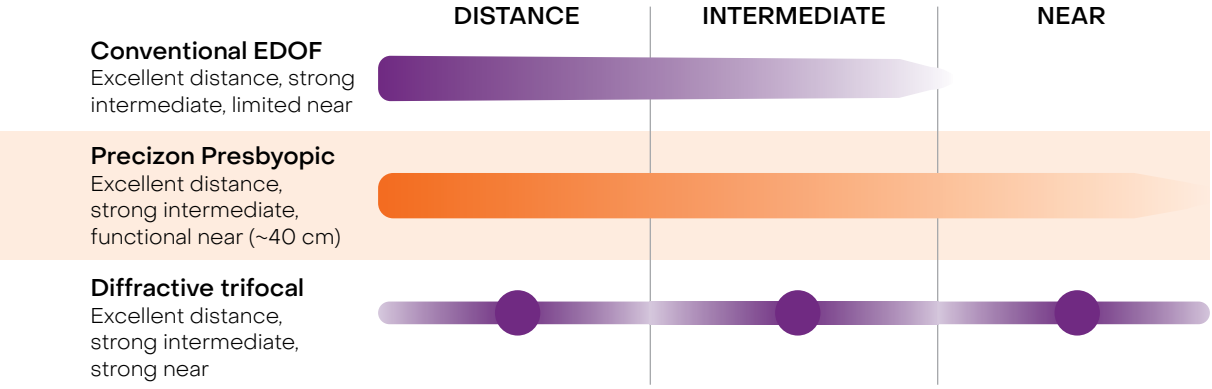

High spectacle independence

Complete spectacle independence reported by 9 out of 10 patients.

Only a small proportion needed glasses for some near activities.[4]

BRIDGING THE GAP BETWEEN EDOF AND TRIFOCAL IOLS

Precizon Presbyopic delivers excellent distance, strong intermediate and functional near vision.

Easy handling with the preloaded IOLMATIC® injector
